Sealants

Sealants are a plastic material that is placed in the pits of chewing surfaces of molar teeth, and have been shown to reduce the risk of cavities.

The American Academy of Pediatric Dentistry recommends that kids receive dental sealants as soon as their adult teeth erupt.

Pediatric Sealants
Item No. DDS060

XRAYS are Essential!

They help us...

- Find cavities
- Look at the roots
- See number, size and position of your child's teeth
- Detect problems that can't be seen with a visual exam

XRAYS are safe for your child, and they help the dentist find potential issues before they become big problems!

Pediatric XRays
Item No. DDS061

XRAYS are Essential!

XRAYS are safe, and they help the dentist find potential issues before they become big problems!

Adult XRays
Item No. DDS069

Baby Teeth

Baby teeth are very important to your child's health and development. They help to chew, speak and smile.

When a baby tooth is lost too early, the permanent teeth can drift into the empty space and make it difficult for other adult teeth to find room when they come in.

Baby Teeth
Item No. DDS062
